

UNIVERSITÀ DEGLI STUDI DI MILANO
FACOLTÀ DI MEDICINA E CHIRURGIA

Dipartimento di Scienze Biomediche Chirurgiche e Odontoiatriche
Direttore: Prof. Aldo Bruno Gianni

Milan, 13/01/2021

To whom it might concern:

The antiviral and virucidal activities of the KATARI lamp, produced by SIMACO Elettromeccanica s.r.l., have been tested by the laboratory of Molecular Virology, Department of Biomedical, Surgical and Dental Sciences, Università degli Studi di Milano, under my supervision.

The results showed that the lamp KATARI is able to reduce the infectivity of SARS-CoV-2, the etiological agent of COVID-19.

The experimental conditions and the results obtained are shown in the detailed report "Antiviral activity of KATARI lamp against SARS-CoV-2".

.

Regards,

Serena Delbue
